BATTERY USE

Handle and store batteries properly to avoid injury or damage. Most battery issues arise from improper handling and, particularly, from the continued use of damaged batteries.

- Do not disassemble or open crush, bend or deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System.
- Use only the Orbic approved Battery and or charger with your device. The use of an un Approved battery or charger may present a risk of fire, explosion, leakage or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
- Only authorized service providers shall replace battery. (If the battery is non-user replaceable).
- Promptly dispose of used batteries in accordance with local regulations.
- Battery usage by children should be supervised.
- Avoid dropping the Tablet or battery. If the Tablet or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.

- Improper battery use may result in a fire, explosion or other hazard.
- The maximum Operating temperature is 45°C. The minimum operating temperature is -10°C.

Note:

The battery shall only be serviced by the manufacturer.

CAUTION:

Risk of explosion if battery is replaced by an incorrect type.
Dispose of used batteries in accordance with local regulations.

Cleaning and Maintenance

The Product, the battery and the charger are not waterproof. Do not use them in places with high humidity like a bathroom and also avoid spilling any liquids on the Product, battery or charger. Use a soft cloth to clean the Product, the battery and the charger. Do not use alcohol, diluted liquid or benzene to clean the Product.

Disposal of Product and Batteries

Follow local regulations regarding disposal of mobile devices and batteries. In some areas, the disposal of these items in household or business trash may be prohibited. Please follow your local regulations and recycle Product if required. Batteries must be recycled or disposed of properly.

Certification Information (RoHS)

We at Orbic take our social responsibility seriously and are committed to the cause of serving our environment. It is in keeping with these commitments that we are proud to state that Orbic phones are RoHS compliant.

Specific Absorption Rate (SAR) Safety

This device has been designed to comply with applicable safety requirements for exposure to radio waves. These requirements are designed for the safety of all persons and follow scientific guidelines which include safety margins.

- The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardised methods with the device transmitting at its highest certified power level in all used frequency bands.
- This device is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy.
- This device is compliance with Specific Absorption Rate (SAR) for general population or uncontrolled exposure limits (2.0W/kg and 4.0W/kg) specified in Council Recommendation 1999/519 EC, and had been tested in accordance with the measurement methods and procedures specified in EN 62209-1:2016 and EN 62209-2:2010+AMD1:2019.
- The highest SAR value for this model tested for use when worn on the body is 1.285W/kg (10 g).
- This device meets RF exposure guidelines when used in the normal position at least 0 mm away from the body.

When a carry case, belt clip or holder is used for body-worn operation, it should not contain metal and should position the product at least 0 mm away from your body. Ensure the above separation distance instructions are followed.

NOTE:

Orbic or the manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to the Product. Such modifications could void the user's authority to operate the equipment.

Data transmission is always initiated by software, which is then passed down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets are initiated by the MAC. These are the only ways the digital baseband portion will turn on the RF transmitter, which it then turns off at the end of the packet. Therefore, the transmitter will be on only while one of the aforementioned packets is being transmitted. In other words, this device automatically discontinues transmission in case of either absence of information to transmit or operational failure.

ORBIC LIMITED WARRANTY

WHO THIS WARRANTY COVERS

This 24 month limited warranty extends only to the original purchaser of this product within the country of sale. This warranty is not transferable. This warranty is conditioned upon the proper use of the Product.

WHAT THIS WARRANTY COVERS
